

Example\_Ecolorigal\_Modelling.mlx is a Matlab live script. It gives a complete example of the method.

If you don't have matlab, you can open Example\_Ecolorigal\_Modelling.html with a any web browser.

You can extend the example to any of your practical application, by changing the construction of the matrixes Obs, Destroy, Inside, Search etc ...

Alternatively, you can run the graphical user interface by writing GUI\_melaleuca is the Matlab command window.

A tutorial video is available at <https://youtu.be/4LYG-o3CrTA>
